8. I agree to retain a copy of this signed agreement as long as I continue to represent the regulated entity specified above as signatory of the company's electronic submissions.

For the Tennessee Division of Water Resources only one permitted facility per Subscriber Agreement will be allowed. If the permit holder has multiple permits in TN that will use NetDMR, each permit will require a separate Subscriber Agreement.

- 1. Permit holders must have training in use of the NetDMR system before being enabled to submit data to the NetDMR production system. 2. Permit holders must successfully complete a submittal to a NetDMR test environment before submittals will be enabled to the production NetDMR system. The NetDMR test area will show the same screens and require the same certification process as does the production system for NetDMR. No certified submittal to the NetDMR test environment will be accepted as a valid report nor will it meet permit reporting requirements when made to the test environment. 3. Permit holders that are enabled in the production NetDMR system shall certify the Discharge Monitoring Reports (DMR) to the NetDMR production environment as the copy of record for the DMR.

The Tennessee instance of NetDMR is for submittal of regularly scheduled reporting of DMR information. Other reporting not suitable for the NetDMR system but required under the permit should be submitted to the TN Division of Water Resources.

#### **D. Inactivation/Removal**

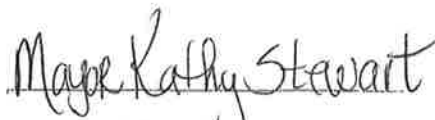

Permittee must indicate reason for inactivation in Section B of the form. This is done to inform the Regulatory Authority whether the permittee is no longer in business or has a temporary reason for inactivation.
